

# NEW RESOURCE ALLOCATION MODEL

The District has implemented a new internal Resource Allocation Model (RAM) in efforts to more clearly align ongoing activities within each of its budget centers.

## Principles

These are the guiding principles that were developed for the new allocation model.

- Recognize the District as the fiscal entity while honoring the unique legacy and culture of each institution
- Use planning and goals to drive the budget process
- Ensure that resource allocation decisions align with the type of funding
- Consider both the inputs and outcomes of proposed budget decisions
- Regularly assess operations and use data to inform the decision-making and planning processes
- Incentivize innovation and program development
- Take a long-term perspective
- Be transparent, simple and easy to explain

## RAM Structure

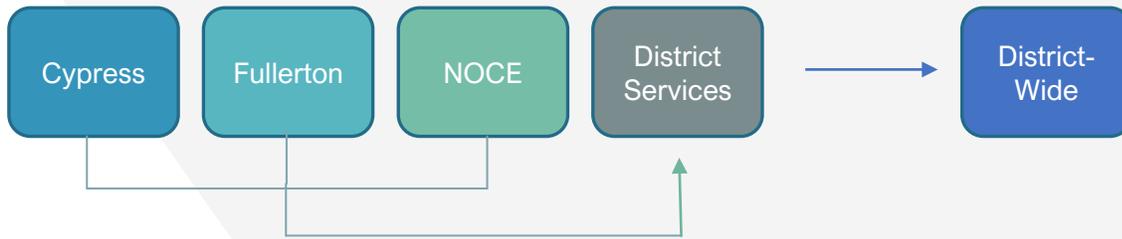

The RAM is a revenue allocation model. It incorporates:

- Student Centered Funding Formula (SCFF) apportionment revenues
- Other state revenues
- Local revenues

It then uses those revenues to cover expenses:

- District-wide shared costs
- All personnel & operating costs by budget center

## Budget Centers

The RAM establishes 4 Budget Centers:

- Cypress College
- Fullerton College
- North Orange Continuing Education
- District Services

The three educational centers contribute revenue towards district services, creating the 4 operational budget centers. The 4 budget centers then all share in covering the costs identified as institutional, or district-wide costs.

# PROPOSED RESOURCE ALLOCATION MODEL BUDGET SUMMARY

## 2020-2021

	<u>DW</u>	<u>DS</u>	<u>CC</u>	<u>FC</u>	<u>NOCE</u>	<u>Total</u>

Balance	-	-	-	-	-	-

# REVENUES

For fiscal year 2020-21, the District expects to have \$222.16 million in revenues, which has been identified by budget center, either directly or by allocation formula. Those revenues form the basis for determining the operating budgets by each budget center. All revenue is considered District revenue because the district is the legal entity authorized by the State of California to receive and expend income and to incur expenses. However, the majority of revenue is provided by the taxpayers of California for the sole purpose of providing educational services to the communities and students served by the District. Services such as classes, programs, and student services are, with few exceptions, the responsibility of the colleges. It is the intent of the RAM to allocate the majority of funds to the campuses in order to provide those educational services. The model intends to provide an opportunity to maximize resource allocation decisions at the campus level. Each campus president is responsible for the successful operation and performance of their college or center as it relates to resource allocation and utilization. The purpose and function of the District Services in this structure is to maintain the fiscal and operational integrity of the District and its individual colleges and centers and to facilitate campus operations so that their needs are met and fiscal stability is assured. District Services is responsible for providing certain centralized functions, both to provide efficient operations as well as to assist in coordination between District Services and the campuses. Examples of these services include; human resources, business operations, fiscal and budgetary oversight, procurement, construction and capital outlay, educational services, and information technology.

This table provides a slightly more expanded view of the components of the RAM.

## SCFF Revenue

SCFF Revenue is the amount anticipated to be received by the District as State Apportionment. Apportionment is the primary source of revenue for the District. NOCCCD's total apportionment is comprised of property tax revenues, student enrollment fees, and a state allocation, calculated using the Student Centered Funding Formula. The SCFF uses FTES and student headcount data to calculate the apportionment. We have used estimated FTES targets for each college for the upcoming academic year to allocate the base funding and have applied assumptions to the headcounts that are used for the additional SCFF components. The SCFF revenue is computed in three parts:

- Base Allocation (70% of the SCFF): This is the enrollment-based component that is most similar to the prior, SB361-based, funding formula. It is the sum of a Basic Allocation funding, derived from the number of colleges and centers in a district, as well as its size, and its funding for Credit, non-Credit\*, CDCP\*, Incarcerated, and Special Admit FTES.

\* Noncredit & CDCP are funded 100% from the Base Allocation and do not participate fully in the other 2 components of the SCFF

- Supplemental Allocation (20% of the SCFF): This is the component of the SCFF that targets equity of access and opportunity for low-income students.
- Student Success Allocation (10% of the SCFF): This is the component of the SCFF that targets and incentivizes successful outcomes of California Community College students. This allocation is based on a district's performance in the following eight outcome metrics: Associate's Degrees, Bachelor's Degrees, Associate's Degrees for Transfer, Credit Certificates, Completion of 9+ CTE Units, Transfer, Completion of Transfer Level Math & English in the first year, and Achievement of Regional Living Wage.

The assumptions used for the SCFF are:

- FTES on which we'll be funded will be the same as FY 19-20. Due to the challenges faced by districts to hold classes adapting to the restrictions on in-person classes under the current COVID-19 pandemic, the State Chancellor's office has permitted districts the opportunity to apply for an emergency conditions allowance. This allowance permits districts to request that FTES from a period prior to the onset of the emergency condition be used for apportionment funding purposes. The District has applied for that allowance and expects to use that allowance for the upcoming academic year.
- 18-19 headcounts are used for the Supplemental and Success components of the SCFF, which is in line with the advanced calculations prepared by the state. Ultimately, the headcounts for funding will use the actual 19-20 submitted data.
- The allocated SCFF revenue is limited to the earned revenue.

## Hold Harmless Allocation

As part of the multi-year transition into the new SCFF, a provision was added to ensure that districts would receive no less than they did for 2017-18, plus COLA, which is 2.71% for 2018-19 and 3.26% for 2019-20, and 0.00% for 2020-21. Funds received under the hold harmless allocation have not been used in the ongoing funding incorporated into the RAM. The District will use the hold harmless funding to supplement RAM, if needed, and has included it in the discussions of uses for one-time funding. The hold harmless funding is expected to end after fiscal year 2023-24.

## Additional Schedules Provided in the appendix

- SCFF Calculator for the District
- FTES trends
- Headcount trends for Supplemental Allocation
- Headcounts for Student Success Allocation

# Other Unrestricted Revenues

The RAM also includes additional unrestricted state revenues received as well as local revenues earned.

State Revenues included are allocated to the campuses based on its proportion of the District's SCFF Base Allocation.

- Enrollment Fee Waivers: This budget is made up of 2% of the enrollment fees collected, which are not used to off-set the apportionment calculation, and the amount received from the State for the 2% that otherwise would have been collected from students had they not received fee waivers.
- Full-Time Faculty Hiring Funds 2018-19: Funds tied to a calculated increase in the Faculty Obligation Number by the state. This allocation was received in 2018-19 and continues to be received at the same level.
- Part-Time Faculty Compensation: Comprised of reimbursements for office hours and health benefits, and an allocation for compensation. The final amount the District will receive will be based on the total claims submitted system wide against the available funds. We have based our estimate on the prior year allocations, reduced by 15% factoring in estimated reductions from the state.
- Lottery (Unrestricted portion): The unrestricted lottery revenue is considered part of the core revenue that is used to fund operations. The District's total allocation is based on FTES and incorporates the early lottery estimates from the state.
- Mandated Costs: Allocation based on funded FTES, as part of a block grant to cover compliance costs incurred during 2020-21. Based upon the many uncertainties over the mandated claim process, including the State Controller's Office audits of these claims, the District has elected to opt into the more certain funding offered by participation in the block grant.

## Local Revenues

- Districtwide Activity revenues consist primarily of interest earned and are allocated in a manner similar to State Revenues discussed above.
- Budget Center Activity are funds that are received for various activities. Each budget center determined their revenue estimates based on their experiences. This also consists of self-supported activities that bring in revenue and are expected to cover their own costs.
- Intrafund Transfers is currently comprised of funds received as RDA revenue that we are contributing towards ongoing resources in the RAM. Allocations are made to the campuses for this contribution on the same basis as the State Revenues discussed above.

## Revenue to the District Office

District Services is considered a budget center and is funded based on an agreed-upon allocation of 9.25% of the revenues from the campuses. As part of the implementation of the RAM, several factors were considered in determining an appropriate percentage, including information on the level of service and allocations at other districts. While the District's allocations appeared low compared to the other districts surveyed, higher allocations negatively impacted one or more of the campuses taking them to potential deficits. Therefore, consideration was given to provide an allocation that was sufficient to allow District Services to operate as a budget center yet still leave each campus able to maintain its operations at the current levels (prior to any future increases in costs).

# EXPENSES

The expenses in the RAM are broken out by budget center as well as the shared district-wide expenses. The table below provides a summary of those expenses.

New Model
